Drupal Ubercart – PayUMoney Integration

Step 1: Please upload the files by going to Modules >> Install new modules. Browse the zip file provided to you and upload it. Then search for the "Securepayu" and enable it but by clicking on "Save configuration".

Step 2: Now goto Store>>Payment Methods. Select PayUMoney and click on "settings" against it. You can change the Payment Gateway mode here. You can either choose TEST or LIVE based on whether you are using Live Merchant Key or Salt or the demo Merchant Key and Salt.

Step 3: Now follow the following path and open **uc_securepayu.module** using a text editor like Notepad ++ etc.

www/yourshop/sites/all/modules/uc_securepayu/ uc_securepayu.module

On line number 226 and 227, you will need to make the following changes –

Line 226 – Replace JBZaLc with the live Merchant Key provided by PayUMoney.

Line 227 – Replace GQs7yium with the live Salt provided by PayUMoney.

```
209    $lastname = substr($order->billing_last_name, 0, 128);
210    $address1 = substr($order->billing_street1, 0, 64);
211    $address2 = substr($order->billing_street2, 0, 64);
212    $productinfo = 'ubercart products information';
213    $amount = uc_currency_format($order->order_total, FALSE, FALSE, '.');
214    $zipcode = substr($order->billing_postal_code, 0, 16);
215    $city = substr($order->billing_city, 0, 64);
216    $state = uc_get_zone_code($order->billing_zone);
217    $country = $country[0]['country_iso_code_3'];
218    $email = substr($order->primary_email, 0, 64);
219    $phone = substr($order->billing_phone, 0, 16);
220
221    $surl = url('cart/securepayu/complete/',array('absolute' => TRUE)). $order->order_id.'/DR={DR}';
222    $furl = url('cart/securepayu/complete/',array('absolute' => TRUE)). $order->order_id.'/DR={DR}';
223    $curl = url('cart/securepayu/complete/',array('absolute' => TRUE)). $order->order_id.'/DR={DR}';
224
225
226    $key='JBZaLc';
227    $salt='GQs7yium';
228    $pg = isset($_SESSION['pay_method']) ? $_SESSION['pay_method'] : 'CC';
229    $string = $key . '|' . $txnid . '|' . $amount . '|' . $productinfo . '|' . $firstname . '|' . $email . '|||||||||||' . $salt;
230    $hash = strtolower(hash('sha512', $string));
231    $data = array(
232        'key' => $key,
233        'txnid' => $txnid,
```

After making the changes save the file and upload it .

Step 4: Follow Step 2 and change the mode from TEST to LIVE and click on Save configuration.

Your Payment Gateway will be up and running.

Please note that by default the Payment Gateway is in the TEST Mode.

Please find the test Merchant key and Salt for testing purpose below –

Test Key – JBZaLc

Test Salt – GQs7yium

Please find below the test credit card details which you might require to run test transactions in test mode –

Test Credit Card Name: any name

Test Credit Card Number: 5123456789012346

Test CVV: 123

Test Expiry: May 2017
